

PPC #509-TuffMask

UV Resistant Cloth Masking Tape

Hand Tearable – UV Stabilised – Easy to Remove up to 14 days.

Product Construction:

A hand-tearable, UV-Stabilised cloth tape with a clean removable adhesive.

Product Sizes Available:

- Standard width available are 24mm, 36mm, 48 mm wide x 25 mts long
- Other widths available on request.

Product Information:

- Designed to meet specific industry requirements.
- Made with a tough, double laminated, UV stabilised, waterproof cloth backing specifically designed for outdoor conditions and remains removable for up to 14 days after being applied.
- Coated with a high coat weight of adhesive to help it apply to even roughest surfaces.
- Will adhere to a wide range of brickwork, concrete, aluminium frame and textured surfaces as well as plastic protection sheeting.
- Used for masking off concrete stencilling.
- Holding plastic protection sheeting in place during asbestos removal or to prevent dust movement on building sites where you do not want residue left on surfaces after removal.
- Supplied in 25 metre rolls and cut to a range of sizes to meet your specific requirements.

PPC TuffMask

UV Resistant Cloth Masking Tape

Technical Data

Principle Composition	Double Laminated, UV resistant cloth with a rubber based PSA.
Total Thickness mm	0.31mm
Peel Adhesion kgs/25mm	0.7 kgs
Tensile strength kgs/25mm	14 kgs
Force to unwind	2 kgs/ 50mm
Holding power (25mm x 25mm / 40°C)	> 60 mins
Temperature resistance 1h/°C	-35 / up to +80
Colour	White

Application

Application Temperature	Above 0 degrees C
Surface preparation	Clean surface to remove any moisture, oil, dust or surface contaminant
Application of product	Apply firm pressure to increase bond.
Clean up.	Dispose of waste in non-recycle receptacle

Storage

Temperature	Moderate Conditions
Storage life (20°C / 60%)	6 months in sealed carton.
